

George Latos

Full stack software engineer · **Open to remote full stack roles**

Rhodes, Greece (UTC+2) latosgeorge@gmail.com lat0s.com github.com/lat0s linkedin.com/in/latosgeorge

Full stack engineer. I work independently, own what I ship and fix it when it breaks, nights included. At RENER Energy I built the iOS and Android app solo and the alerting for its energy monitoring platform. React, TypeScript, C#/.NET, PostgreSQL.

EXPERIENCE

Software Engineer, Full Stack · Mobile Lead · RENER Energy S.A.

Aug 2025 to present · Remote, async

- Proposed and built real-time alerting for Nexus, RENER's energy monitoring platform. Faults are now caught as they happen instead of after 12+ days, with automatic tickets and email, SMS and push alerts
- Sole developer of the iOS and Android app, from design to release. Proposed moving alerts from SMS to push, saving about €5,200 a year
- Built the integration with HENEX, the Greek energy exchange, and features across React, TypeScript, C#/.NET, PostgreSQL, Redis, InfluxDB and MQTT

Freelance Full Stack Engineer · Olteca

Jan 2025 to present · Remote, Greece

- Built and run eight production web apps for clients in Greece and Cyprus, most on Linux servers I set up and maintain
- Largest: eoko.gr, a directory of 2,000+ businesses with AI assisted imports and a CRM, and chrysolefou.com, a recipe platform with semantic search and a custom CMS

OPEN SOURCE

flossophy Dentist booking app with a live demo. Double bookings are impossible by design. Vue 3, Koa, MongoDB, TypeScript

unblocked Desktop planner that turns free-form notes into tasks and calendar events with Gemini or OpenRouter. Tauri 2, Rust, React

latos-taskmanager Linux task manager with CPU, memory, disk and GPU per app. Rust, React, TypeScript

SKILLS

Languages	TypeScript, C#, JavaScript, Java, SQL, Python
Frontend and mobile	React, Next.js, Angular, Vue, Capacitor (iOS, Android)
Backend and data	.NET, Node.js, PostgreSQL, Redis, InfluxDB, MQTT
Cloud and infra	AWS, Azure, Docker, Linux and VPS servers, Cloudflare, networking, firewalls
Delivery	Git, GitHub Actions, Azure DevOps, Jira, Playwright, Coolify
Spoken	Greek (native), English (fluent)
Military service	Completed

EDUCATION

MSc Human-Centered AI · University of Gothenburg

2025 to 2027

Part time, expected 2027.

BSc Software Engineering and Management · Chalmers / University of Gothenburg

2022 to 2025

Thesis: AI written vs human written code
